

I travel the roads of the eastern US five days a week and XM is my savior. While traveling I depend on XMs' weather, traffic, and programing that I can not find on the radio stations. I understand that XM has, and will continue to have, an effect on the adversizing dollars the radio stations receive. However, XM would never have found a nitch from which they have taken market share from the radio stations if the radio stations were serving the needs of the public. For once take your hand out of the cookie jar and do the right thing. Don't support the special interests. Bottom line, I pay for this service, not you. What right do you have to regulate a service that I pay for? Please reject the NAB's petition 04-160!
